

## Nebelung (NEB)

- Body** The medium sized, slightly elongated cat has a medium solid, muscular body with graceful stature and overall impression.  
The legs are long and slender, the paws are narrow and oval.  
The tail is long and ends in a slightly rounded tip.
- Head** The head is of medium length, with a flat skull. The flat forehead and the straight nose form a convex angle in profile at the level of the eye brows. Ideally the forehead forms one third and, the nose two thirds of the profile.  
The whisker pads are very pronounced, the chin is firm.
- Ears** The ears are large and slightly pointed. They are slightly tilted forward and set wide apart. The inner side is sparsely furnished, causing the ears to appear thin and almost transparent.
- Eyes** The eyes are large and oval. They are set wide apart.  
The colour is an intense green.
- Coat** The coat is of medium length, silky and soft. Because of the undercoat the coat is dense, but the frill and the trousers are not very pronounced.
- Colour varieties** Pure, even blue, with a distinct silver sheen (the tips of the hairs have a silver tipping). A medium blue colour is preferred.
- Nose leather** blue-grey
- Paw pads** lavender pink
- Faults**
- too deep set or protruding eyes
  - any tendency to squint

### Scale of points

Body	25 points
Head	30 points
Eyes	10 points
Coat texture	20 points
Coat colour and Tipping	10 points
Condition	5 points
