

Singapura (SIN)

Body

The relatively small cat has a compact and solid build. The rib cage is rounded and the back is slightly arched.

The legs are rather muscular and of medium length, narrowing evenly to small, oval paws.

Tail

The tail is of medium length and slender with a slightly rounded tip

Head

Rounded head with a rather short, broad and pronounced muzzle. The profile is curved, with a slight indentation below the eye level.

Ears

The ears are very large, broad at the base, with slightly rounded tips and light tufts inside.

They are medium high set and tilted slightly forward.

Eyes

The eyes are strikingly large and rounded. They are wide set (at least one eye's width between).

Eye colour varies from yellow-green to yellow to hazelnut-brown.

Coat

The coat is short, dense, fine and close lying to the body.

Each single hair has double or preferably triple bands of ticking. The ticking shall be uniform, without stripes over the body.

The line along the spine (eel line), the tail tip and the back of the hind legs (plantar faces) are the same colour as the ticking. Chest and belly are without ticking and show only the base colour.

The inner side of the legs may show slight stripes.

Colour varieties

The colour sepia-agouti is recognized. The base is ivory, banded with a warm brown tone.

Nose leather salmon, rimmed in seal. Paw pads seal

Faults

- Eyes protruding too much

Scale of points

| | |
|----------------------|-----------|
| Body | 20 points |
| Head, ears | 35 points |
| Coat texture | 10 points |
| Coat colour, pattern | 30 points |
